

Klemen Pavlovič

Web Developer

Krška vas, Slovenia · klemenpavlovic@gmail.com · 051 245 574 · github.com/kpav33

SUMMARY

Web developer focused on React and Next.js, comfortable across the rest of the stack. Spent the last five years at Dekrypt building client projects, from multilingual business sites to booking platforms and crypto gaming apps, usually as the lead frontend developer.

EXPERIENCE

Web Developer · Dekrypt d.o.o. 2022 – Present

- Build and maintain production React / Next.js applications, owning features from UI implementation through to ship.
- Take on backend, data, and integration work when a project calls for it.
- Deliver client projects for partner companies on a contract basis through Dekrypt, often as the lead frontend developer.
- Handle deployment, monitoring, and ongoing maintenance across Netlify and Coolify.

Web Developer (Student) · I.T.I. računalniške storitve (Miha Bradač s.p.) 2020 – 2022

- Built client websites and provided technical support to users.
- Diagnosed and resolved hardware and software issues.

SELECTED PROJECTS

HashArcade · hasharcade.io · React, TypeScript, PixiJS, Socket.IO

Built the game frontends across the catalog — lobby shells and in-browser game UIs with real-time play wired to the platform backend.

Sachi · sachi.game · React

Web3 gaming platform. Took over the player frontend from another team and owned the dashboard — wheel of fortune, user management, items marketplace, leaderboard, and poker integration.

Physifit · physifit.si · Next.js, TypeScript, Strapi, Stripe

Built a multilingual (EN / FR / SL) wellness-studio site with online booking, Stripe checkout, and a staff admin for calendars, sessions, and patients.

Medicina Volovec · medicina-volovec.si · Next.js, React, Express, PostgreSQL

Rebuilt it end to end, replacing a legacy Laravel stack — custom React admin CMS, Express APIs, and a trilingual public site with one-click publishing.

Skala · skala.si · Next.js, Prismic, Recharts

Built a bilingual company site with Prismic-powered news, live commodity-price dashboards, and investment project pages.

Web3 client work · wagmi, viem, RainbowKit, ethers.js, IPFS, The Graph

Built React / Next.js frontends for multiple crypto / blockchain client projects at Dekrypt, plus the wallet and on-chain integration layer — including a web3-native file-sharing app on IPFS and The Graph.

SKILLS

Frontend React, Next.js, TypeScript, JavaScript, Vite, CSS Modules, HTML, CSS

Backend & Data Node.js, Express, NestJS, PostgreSQL, Redis, Strapi, Prismic

Web3 & Payments wagmi, viem, ethers.js, RainbowKit, IPFS, The Graph, Stripe

Infrastructure Coolify, Netlify, Socket.IO, Resend, Git & CI

EDUCATION

Engineer of Informatics (Inženir informatike) · Višja strokovna šola Novo mesto

2021
